SIEMENS

So sophisticated, so discreet, so smart. Siemens Life is the perfect fit for your world. It delivers impeccable sound quality from a small, beautifully designed instrument—bringing you incredible performance in an open fitting. Its fully automated technology means you never have to adjust a thing. Including your style.

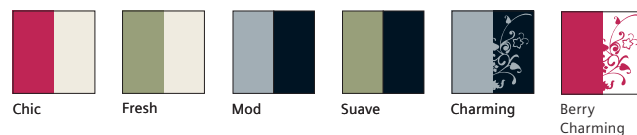

Suave.
One of Life's 16 color options, Suave, is truly sophisticated. Its sharp combination of black and olive is clean and modern.

It speaks quiet sophistication.

Life's elegant, well-designed housing is nearly invisible on the ear. With 10 skin and hair tones and 6 exclusive fashion colors to choose from, you may not even mind if someone catches a glimpse. Not ready to settle on one favorite color? No problem. Your Audiologist or Hearing Care Provider can easily swap your housing for another in one office visit.

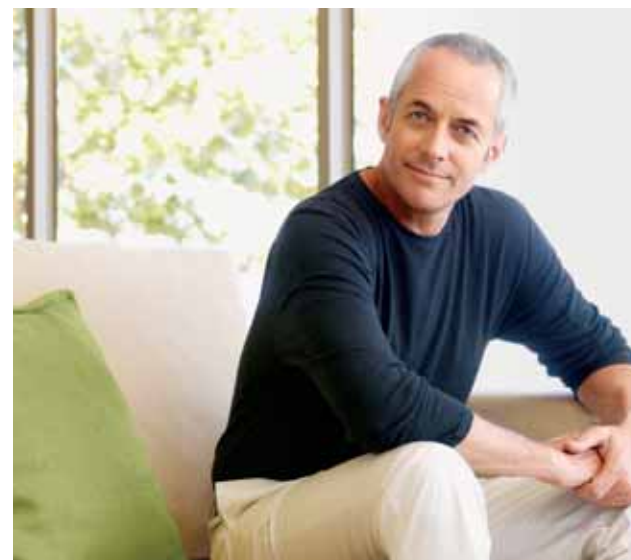

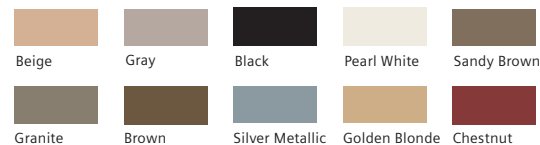

Life's exclusive fashion colors let you express your style.

It speaks comfort.

With its small size and ergonomic design, Life is easy to wear and hard to detect—making it twice as comfortable. It's an instant fit on almost every ear, which means you can start enjoying better hearing right away. Best of all, its open design eliminates the unpleasant plugged-up feeling some people experience with traditional instruments.

Subtle skin and hair tones blend right in.

It speaks freedom.

Life is fully automatic, so you can sit back. Relax. And let the technology do all the work. With Life, you never have to worry about changing programs or volume—even in challenging listening environments. Of course, if you prefer to have more control of your instruments, you can make manual adjustments with our stylish new ePen™ remote control.

The ePen offers a discreet alternative to traditional remote controls.

It speaks your language.

A more natural, intuitive hearing experience. Doesn't that sound great? Whether you choose Life 700, 500 or 300, you get an amazing array of smart technology features.

Natural sound technology.

Our breakthrough **TruEar®** technology simulates natural acoustics to distinguish sounds in front of you from those behind you. At the same time, our **e2e wireless® 2.0** technology synchronizes your instruments for better localization of sounds from left to right. With Life, you won't miss a thing. Our advanced **SoundBrilliance™** enhances your perception of high pitches for a richer, fuller sound.

Sound comfort technology.

Life automatically reduces background noise with our **Speech and Noise Management** technologies, while softening sudden, annoying sounds like clanging dishes with **SoundSmoothing®**. An **Automatic Adaptive Directional Microphone** softens sounds that comes from the side or behind you, so you can focus on the conversation you're in. Even the wind is no match for Life—its **eWindscreen®** feature automatically monitors your environment for wind noise and softens it. And no matter how feedback-prone your environment is, our **FeedbackBlocker™** reduces or eliminates annoying whistling.

Learning technology.

With **DataLearning®**, Life automatically learns and adapts to your volume preferences in different environments, virtually eliminating the need for manual adjustments. Our exclusive **SoundLearning™** technology takes DataLearning to the extreme, learning your specific preferences for loud and soft sounds.

Connectivity.

Hearing better with style is easy with **Siemens Tek™ wireless enhancement system**. Paired with select Life hearing instruments, you can enjoy stereo-quality sound from your **Bluetooth®** wireless technology enabled mobile phone, MP3 player, and more. The Tek Connect remote control streams audio as well as provides one-touch control of various hearing instrument settings.

TEK Siemens Life is Tek-ready.
