Naída
PowerHearing

Power to change life

More Hearing. Slim Design. WaterResistant.

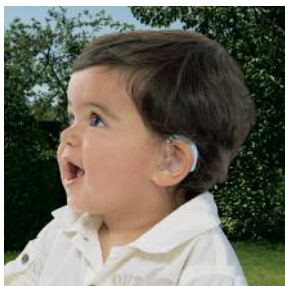

PHONAK

life is on

More hearing

Exceptional audibility and clarity

Packed with unique and intelligent features, such as SoundRecover and WhistleBlock Technology, Naída offers exceptional levels of audibility and clarity.

Breakthrough in speech and language development

The unique SoundRecover ensures audibility of high pitched sounds, beyond what is available with conventional amplification. It plays a crucial role in the development of speech and language, giving children with a significant hearing loss a greater chance to catch up with their hearing friends.

No feedback, more sound

WhistleBlock Technology effectively removes feedback (whistling), so children with a significant hearing loss can profit from increased amplification, wherever they are, whatever they do.

For an active life

Comfortable and robust

Slim design and child-friendly colors

The slim instruments are just right for a snug and comfortable fit behind small children's ears. Naída Junior is available in 18 different colors.

Always dependable, no matter where or what

Naída allows your child to participate in sports, bounce around the playground or even get caught in the rain. None of these activities compromise performance and reliability. Though flexible and robust, Naída is not designed for use in the shower or while swimming and diving.

Safe and easy to operate

Naída offers unique options for your peace of mind:

- a tamperproof battery lock prevents children from accessing the battery
- the optional volume control keeps children from changing the optimal settings

Connecting kids

Access to the world of wireless communication

Design-integrated FM

Design-integrated FM solution

This elegant and convenient water resistant FM solution allows children to reach their full potential.

iView

Perfect support for parents and caregivers

The new and unique iView gives you reassurance at the touch of a button. iView shows the status of key functionalities of your child's hearing instruments: battery, volume level and current program.

iCom

Opening up the world of wireless communication

iCom provides seamless connectivity to mobile phones, computers, laptops, MP3 players or televisions. It is the ideal companion for children in the modern world of communication.

Only the best for little ears

Hearing is critical to speech and language development. Children with a significant hearing loss depend on technologically sophisticated solutions in order to reach their full potential. The Naída Junior high-power models are the first tailor-made hearing systems dedicated to their specific needs.

- More Hearing: Full access to speech and language from day one
- Slim Design: A perfect fit behind small ears
- WaterResistant: Withstands the physical activities of childhood

Naída offers a variety of models in two price categories.

Try Naída and let your child experience the power to change life. www.naida.phonak.com

Life is on

We are sensitive to the needs of everyone who depends on our knowledge, ideas and care. And by creatively challenging the limits of technology, we develop innovations that help people hear, understand and experience more of life's rich soundscapes.

**Interact freely. Communicate with confidence.
Live without limit. Life is on.**

Better hearing. Better living.
