

NITRO™

This is nothing.

You won't believe the power.

SIEMENS

One small instrument for hearing, one big advantage for people with severe hearing loss.

If you have severe hearing loss, you may have been told that small hearing instruments aren't for you. Simply put, most custom instruments have never been powerful enough to meet the needs of people with severe hearing loss. Until now.

Introducing Siemens NITRO™ – a hearing instrument that shatters these limitations. With NITRO, even people with severe hearing loss may benefit from small, attractive custom hearing instruments.

The answer you've been waiting for.

Hearing technology has finally caught up to your needs. NITRO offers the power of Behind-the-Ear hearing instruments, but in a much smaller package that fits entirely in the ear. It also offers improved feedback cancellation technology, which reduces or eliminates the unwanted whistling that can be associated with powerful instruments. Thanks to NITRO, more people can enjoy desirable, cosmetically-appealing instruments. So people will notice that you're hearing better and nothing else.

Brains to go with the brawn.

While NITRO packs up to 70 decibels of gain into a tiny package, it has more to offer than just out-of-this-world power. NITRO also has a variety of features that will enhance your hearing experience.

Feedback cancellation.

Eliminates or reduces annoying whistling to provide a more pleasant listening experience.

Data logging.

Records important data that your Audiologist or Hearing Care Provider can use to better fine-tune your instrument.

Stationary noise reduction.

Reduces steady-state noises such as cars and fans, and makes listening more effortless.

SoundSmoothing™ (NITRO 16 only).

Reduces annoying transient sounds for greater comfort.

C-Guard™ wax protection system.

Protects the receiver, and enhances durability and reliability.

Optional push button and volume control (space permitting).

Accesses multiple programs for optimal hearing in a variety of situations.

The power to choose.

If custom hearing instruments were not an option for you in the past, NITRO could be the answer. Talk to your Audiologist or Hearing Care Provider to learn more about the power of NITRO.

Hearing instruments may help people hear better, but no hearing instrument can solve every problem or restore hearing to normal.
