**SIEMENS**

Your music.

Your movies.

Your family.

Your friends.

Your shows.

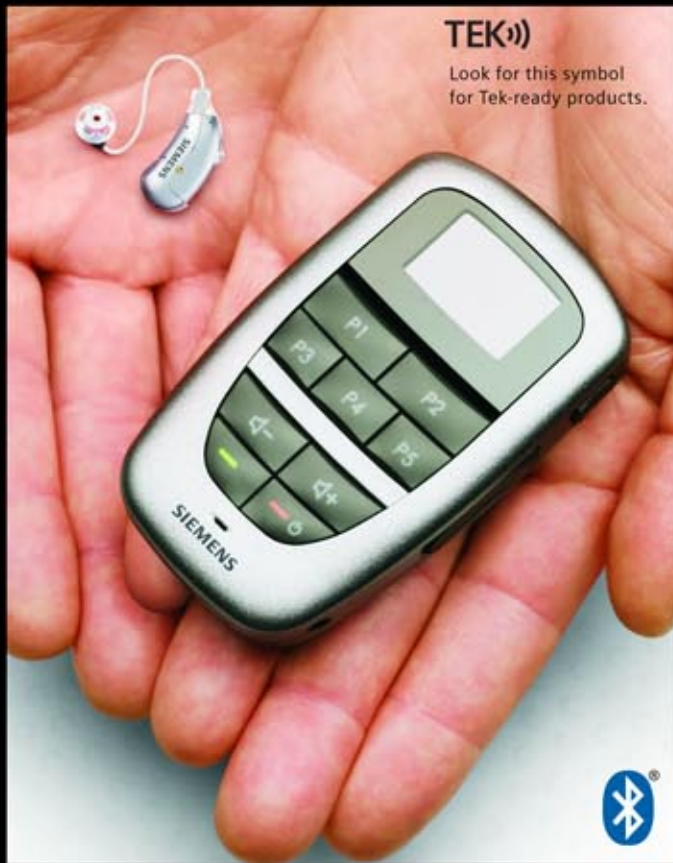

# Be one.

Your info.

Your world.

At last, for people who love technology — Siemens Tek<sup>®</sup>: The wireless enhancement that streams audio from MP3 players, *Bluetooth*<sup>®</sup> wireless technology enabled phones, TVs, and stereos directly to select Siemens hearing instruments. So you can truly be one with your world.

TEK)))

Look for this symbol for Tek-ready products.

Tek Connect communicates wirelessly with your hearing instruments, turning them into a virtual hands-free headset. Tek Connect transmits stereo audio signals simultaneously to both hearing instruments.

Make, take, and end calls directly from your Tek Connect to your Bluetooth® wireless technology enabled mobile or cordless phone.

Your MP3 player or stereo can be connected directly to Tek Connect using the 2.5 mm stereo input plug. You can also connect to your music using the Tek Transmitter (a Bluetooth wireless technology adapter) which comes pre-paired with your Tek Connect.

Tek Connect communicates with the Tek Transmitter using a Bluetooth protocol. With other Bluetooth protocols, there is an inherent transmission delay that produces an annoying echo, and can cause the picture and sound from your TV to be slightly off. But with Siemens Tek, signal delay is reduced so your eyes and ears are always in sync.

# Link to your

Tek™ Connect, the remote control for Siemens Tek, was specifically designed to meet the needs of today's interactive hearing instrument wearer. It speaks the same language as your other high-tech toys. Giving you better performance and true stereo sound quality. Not to mention convenience and comfort. It's time for everything to get in sync.

# mobile,

Hear the call in both ears. Now there's an easier way to connect with your phone (mobile or landline). Answer calls from a button on Tek Connect. Get the signal directly in both hearing instruments. Leave your phone in your pocket. Life is easy.

To find out more about Tek Connect and which Siemens hearing instruments are Tek-ready, contact your Audiologist or Hearing Care Provider and get connected today.

# music,

Every note in stereo. From now on, nothing will get between you and your music. Tek Connect streams stereo sound wirelessly from your audio system or MP3 player right to your hearing instruments. Suddenly earbuds are so 20th-century.

# television.

In stereo. In sync. Enjoy optimum audio whether you're screening a DVD or simply watching TV. There's no disturbance. No feedback. With sound streamed directly to your hearing instruments, there's no need to fight over the volume control. Sounds good, doesn't it?
