

Your life. Your way.

Truly interactive hearing.

No other hearing technology is quite like Yuu™

Experience exceptional sound wherever life takes you. Personalize every listening situation so it's just right for you. Effortlessly teach your automatic hearing instrument your preferences. That's the Yuu difference.

You're in control

Yuu is an interactive hearing instrument that automatically adapts to your dynamic hearing needs. Discreet and convenient, this innovative technology delivers an exceptional listening experience in your diverse listening situations. Then Yuu actually learns your unique preferences in every situation, giving you the ultimate control to enjoy listening the way *you* want.

Interact with Yuu

It's personal

Experience Yuu

As listening situations change, your Yuu interactive hearing system automatically adjusts to provide exceptional sound quality and clear, effortless listening, with no need for manual program changes.

Personalize Yuu

With traditional hearing instruments, the only way to refine your listening experience is by adjusting your volume. Yuu allows so much more precision, enabling you to enhance the clarity *and* volume of speech while minimizing background noise. Simply adjust the settings so they are right for you.

Teach Yuu

Each time you make a personal adjustment you're gradually teaching Yuu your listening preferences in different listening situations. And with the learnNow™ feature (✔), available exclusively with Smart Control, you can make this teaching process happen instantly.

Make it just right with Comfort-Clarity Balance

In noisy situations where you want to hear speech better, simply adjust the Comfort-Clarity Balance for more *clarity*. Move the balance control towards *comfort* to help diminish unwanted background noise.

You're the teacher

When you make adjustments to your Comfort-Clarity Balance and volume control, your Yuu hearing instrument is learning just how you like to hear in each situation. The next time you encounter a similar situation, these refinements will occur automatically. If you choose Smart Control, you can instantly teach Yuu your preferences with a single click of the learnNow™ button (✔).

Superior features: superior sound

Yuu sounds just right

Comfort and care – let's face it: there are some sounds you'd rather not hear quite so loudly. AntiShock™ takes care of those sudden, uncomfortable noises, like a car door slamming, without affecting the sounds you want to hear.

Feedback management – Yuu's advanced feedback manager is designed to provide a comfortable listening experience without the risk of feedback.

Chat away – when you pick up the telephone or cell phone, Yuu automatically switches to a listening program optimized for telephone use. When you hang up the phone, Yuu returns to the listening program previously in use.

Additional premium features

Yuu's adaptive directional microphones help you enjoy clear, intelligible speech no matter where you are. Plus, advanced speech enhancement amplifies speech so you won't miss out on the conversation.

What's your style?

Whatever your style, there's a Yuu for you: choose from an array of hearing instrument styles and colors, including the new ultra-contemporary metallics.
